Guide to Installing Printer Drivers

Installing a printer / copier driver is a relatively simple process. The guide below should enable you to select and download your printer driver in a matter of minutes, allowing you to be up and printing in no time.

For Sharp Printers and Copiers

Click on the link below to go to the Sharp Download Centre:

Sharp Printer Drivers

- For product type in the model of the copier / printer you require the driver for, e.g. MX-2651 or MX-2640
- Select 'English' from the language dropdown list
- For Category, select Digital Copier / Printer
- Click on **Search**
- Click on Drivers
- Select the printer driver for your operating system and click on **Download**

For Lexmark Printers and Multifunction Devices

Click on the link below:

Lexmark Printer Drivers

- Product or Software Name: Enter product model number, e.g. XC4140
- Select Operating System: Select the operating system for your computer
- Select Version: Select the version of your operating system, if required
- Select a Language: This will normally auto select
- Click **Submit**
- Click the Universal Printer Driver tab
- Click on the Universal Print Driver Installation Package
- Click **I agree - download**

For Xerox Printers, Copiers and Multifunction Devices

Click on the link below:

Xerox Support

- Enter the model number into the search box, e.g. C405
- Click on the **Drivers & Downloads** tab
- Click on the Drivers and downloads link for your device
- Click on the box to agree to the terms and conditions for the Driver Installer
- Click on Download
